# Data Governance Quality Index (DGQI 2.0)

2023

# Table of contents

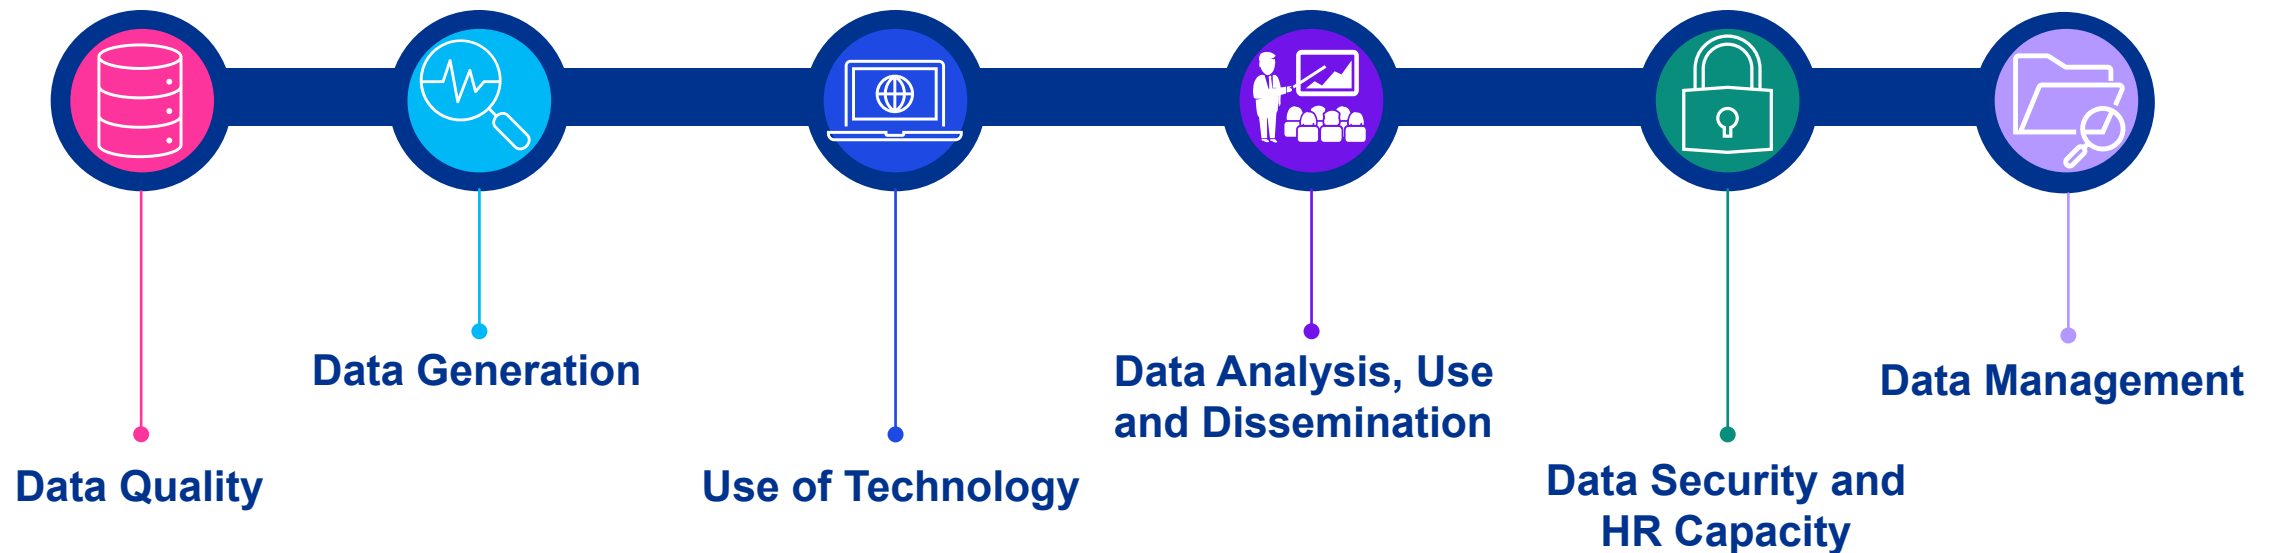

<b>01</b>	What is DGQI	3	<b>11</b>	Approach	15
<b>02</b>	Purpose of DGQI	4	<b>12</b>	Envisaged Key Thematic Interventions	17
<b>03</b>	DGQI 1.0 recap	5	<b>13</b>	Illustrative Scheme Assessment framework	20
<b>04</b>	Introduction DGQI 2.0	6	<b>14</b>	Way forward	21
<b>05</b>	DGQI 1.0 Vs DGQI 2.0	7			
<b>06</b>	Overview	8			
<b>07</b>	Theme wise weightage	9			
<b>08</b>	Overall DGQI Scoring	12			
<b>09</b>	MoT Score Q – 4 (21-22)	13			
<b>10</b>	Role of PMU				

# What is DGQI

Self-assessment-based review of data preparedness levels across Ministries / Departments to produce a DGQI score card.

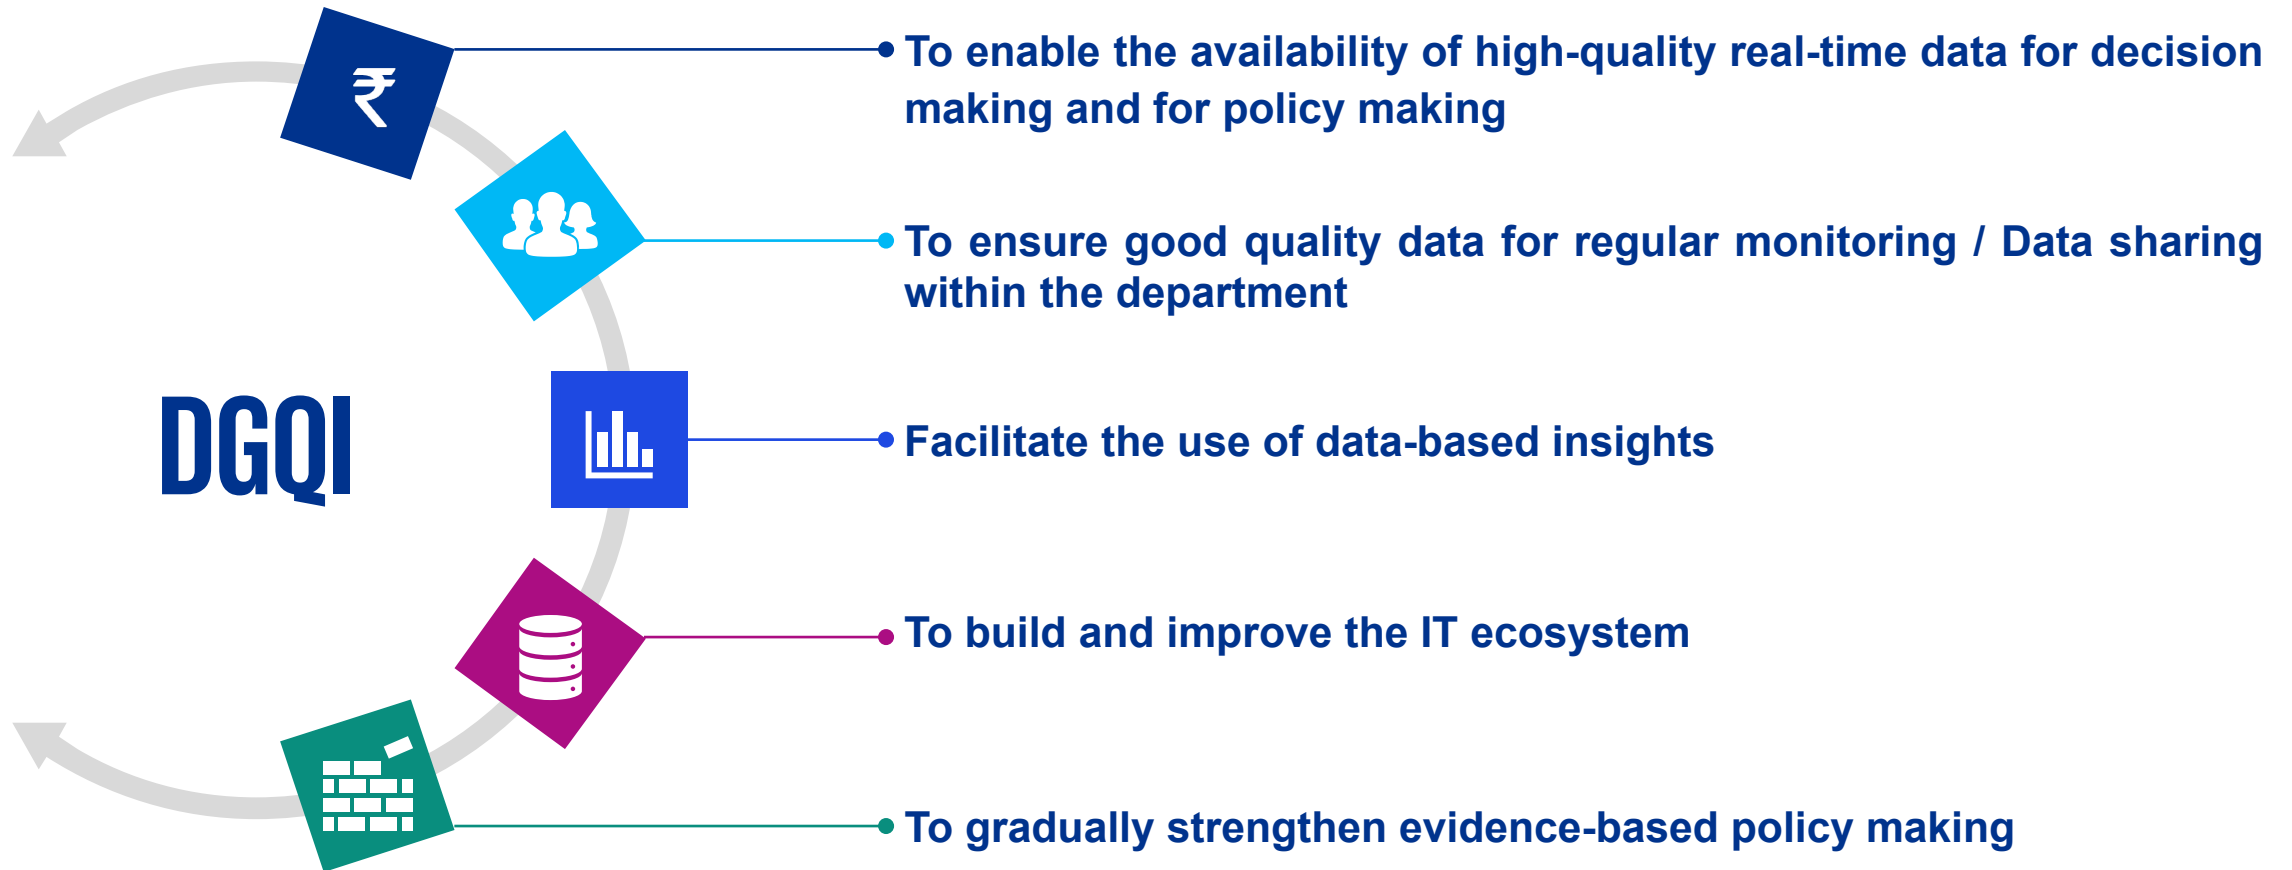

The objective is to assessing data preparedness of Ministries / Departments on a standardized framework to drive healthy competition among them and promote cooperative peer learning from best practices.

An online questionnaire was prepared under six major themes of DGQI:

# Purpose of DGQI ?

The intent of the DGQI is to enable Ministries/ Departments and state departments to assess themselves at various levels of data maturity on the basis of a standardized framework, which in turn would facilitate deepening of digitization in the Government of India.

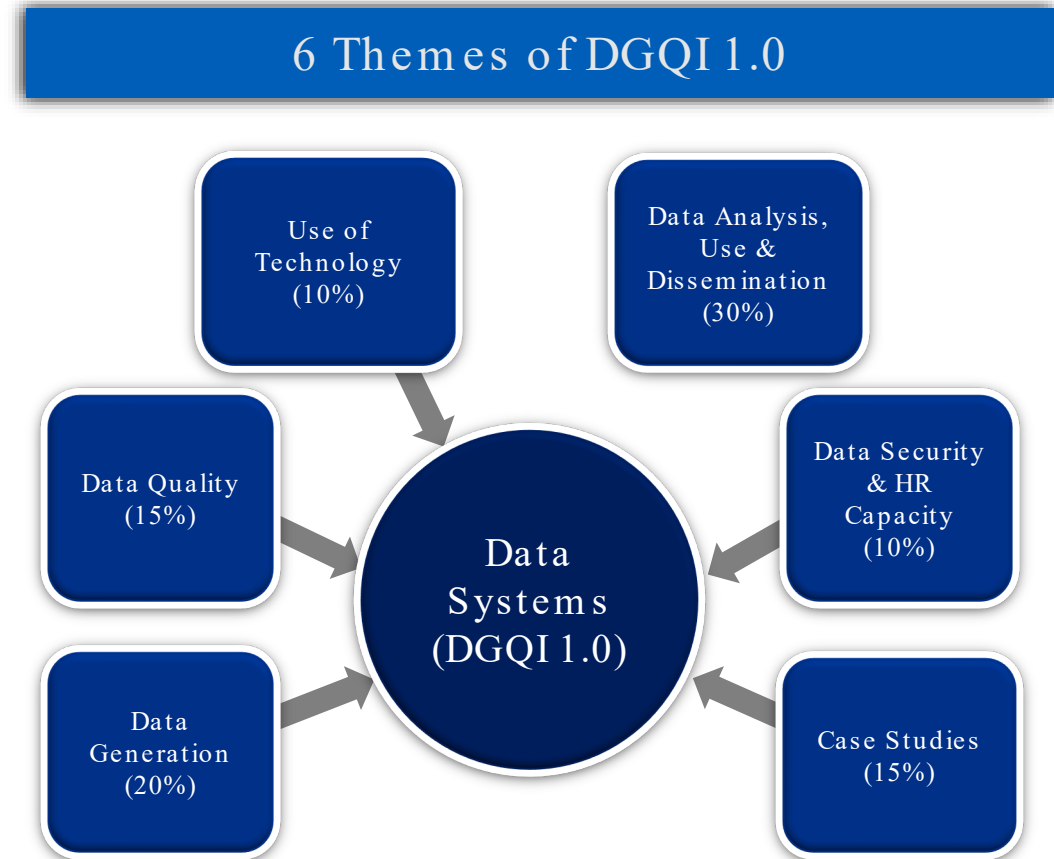

# DGQI 1.0 Recap

DGQI 1.0 was a framework developed by NITI Aayog to assess the quality of data governance practices in various sectors and institutions in India.

Includes six pillars for assessing data governance practices

Across these six pillars, there were 56 indicators that covered different aspects of data governance practices

The framework provided guidelines for assessing each indicator, including the data sources and methods for collecting and analyzing data.

# Introduction and Objective of DGQI 2.0

## What is Data Governance Quality Index?

5.0 point index based on standardized self-assessment framework to assess and improve data maturity of Ministry/Departments (M/Ds) for sustainable data driven decision making in programmatic interventions

### Objectives

To **review** and **assess** the **data preparedness** of the data/ MIS systems

To prepare a **self assessment Diagnostic tool** – Trigger **contemplation on improvements**

To prepare a Data Governance Quality Index to attain frontier 5.0 scores by 2022

To document & disseminate **best practices**

Competitive

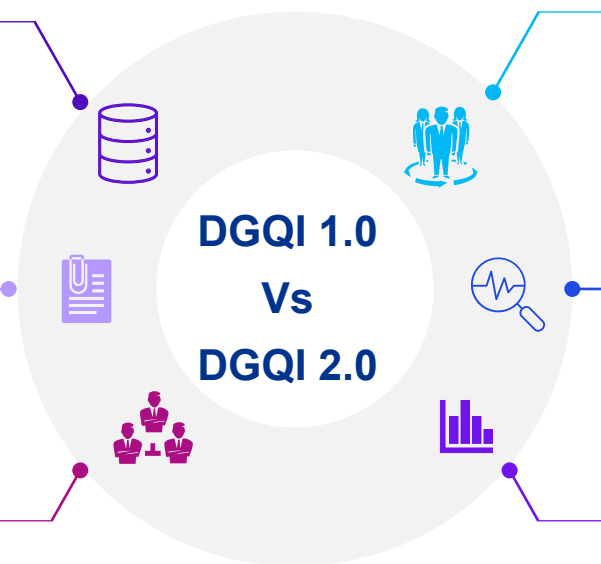

Cooperative

# DGQI 1.0 Vs DGQI 2.0

DGQI 2.0, is a more comprehensive and detailed framework than its predecessor, DGQI 1.0.

DGQI 2.0 is envisaged as a regular exercise with quarterly reviews

Under DGQI 1.0, M/Ds provided information on data systems for few CS/CSS schemes. Under DGQI 2.0, M/Ds must include all their CS/CSS schemes under DGQI.

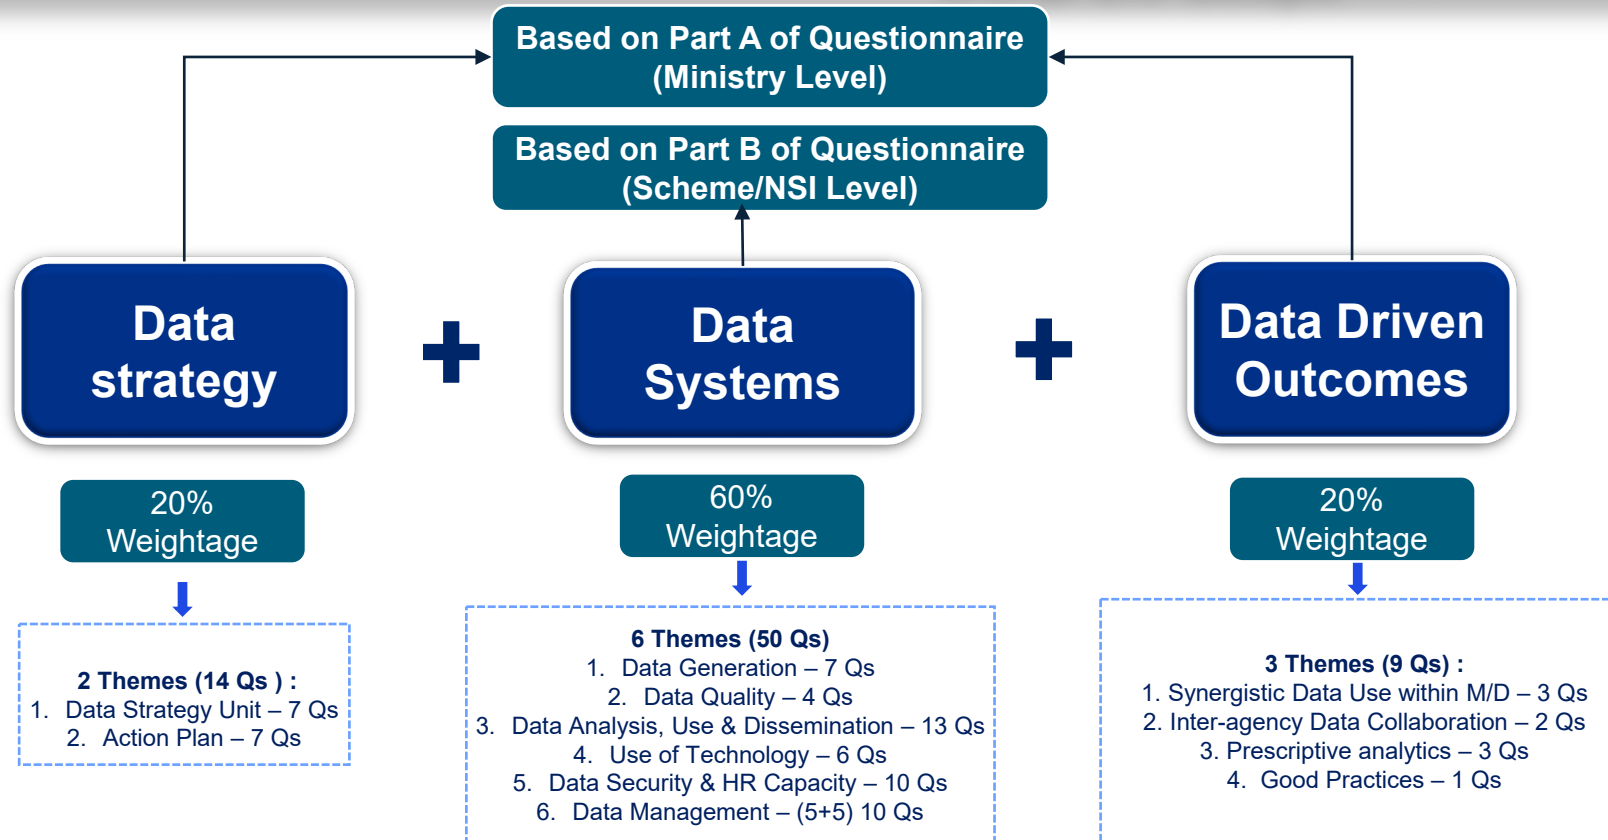

DGQI 1.0 focused only on Data Systems Pillar, while DGQI 2.0 will focus on Data Strategy and Data driven outcomes also.

DGQI 2.0 includes 70 indicators, compared to DGQI 1.0's 56.

DGQI 2.0 scores would also be integrated with Prayas dashboard

# DGQI 2.0 Overview

## DGQI 2.0 Scope

## Scoring Overview

**DGQI 2.0 Score**

Overall DGQI 2.0 Score = 20% \* (Data Strategy score) + 60% (Data Systems score) + 20% \* (Data Driven Outcomes score)

# Theme wise weightages - Data Strategy Pillar

Theme	Theme weightage within data strategy pillar
Data & Strategy Unit	50%
<u>Action Plan</u>	50%

**Data strategy score = 50% \* (Data & Strategy Unit score) + 50% \* (Action plan score)**

# Theme wise weightages – Data Systems Pillar

Theme	Theme weightage within data systems pillar
Data Generation	18%
Data Quality	18%
Data analysis, use & dissemination	18%
Use of technology	10%
Data Security & HR capacity data	18%
Data management	18%

**Data systems score for each scheme/NSI = 18% \* (Data gen score) + 18% \*(Data qual) + 18% \* (Data analysis) + 10% \* (Use of tech) + 18% \*(Data sec& HR capacity) + 18% \* (Data management)**

**Simple average of all scheme-level/NSI data systems scores to arrive at aggregated data systems score**

# Theme wise weightages - Data Driven Outcomes Pillar

Theme	Theme weightage within data driven outcomes pillar
<u>Synergistic data use within M/D</u>	30%
<u>Inter-agency data collaboration</u>	30%
<u>Prescriptive Analytics</u>	10%
<u>Good practices</u>	30%

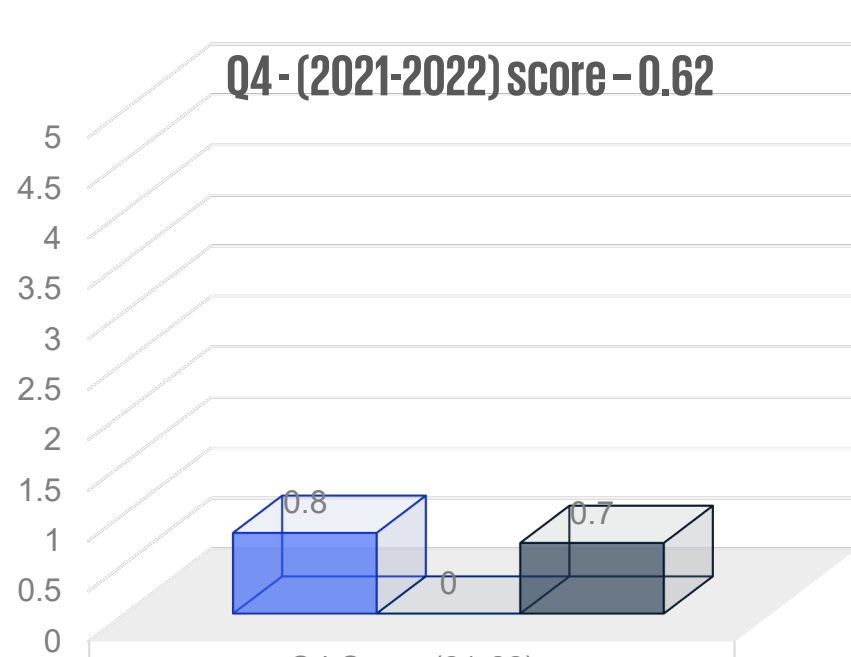

**Data outcomes score = 30% \* (Synergistic data use score) + 30% \* (Inter-agency data collab score) + 10% \* (Prescriptive analytics score) + 30% \* (Good practices score)**

# Overall DGQI Scoring

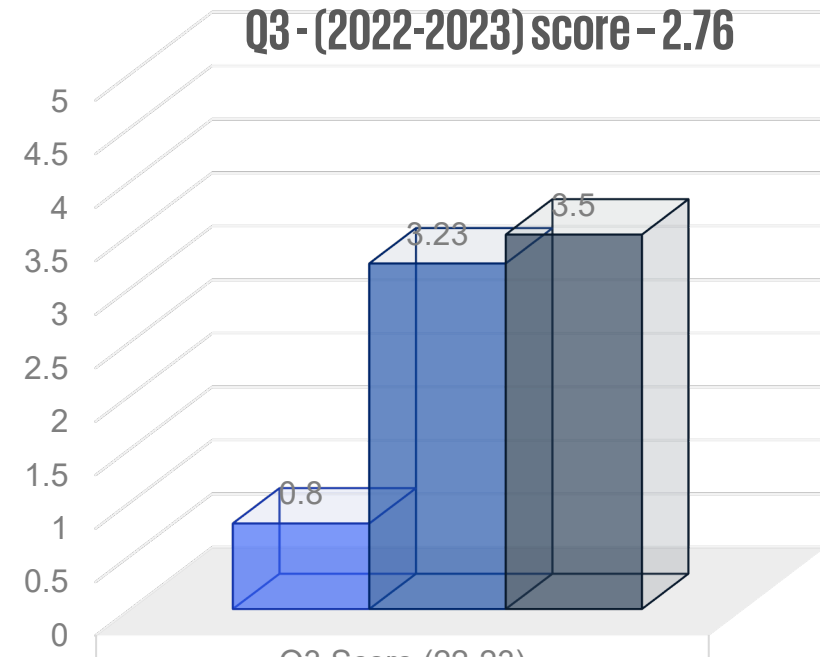

Pillar Weight in DGQI	Theme	Theme weight within pillar	Overall theme weight in DGQI
Data Strategy (20%)	DSU	50%	10%
	Action Plan	50%	10%
Data systems (60%)	Data Generation	18%	11%
	Data Quality	18%	11%
	Data analysis, use & dissemination	18%	11%
	Use of technology	10%	6%
	Data security & HR capacity	18%	11%
	Data management	18%	11%
Data driven outcomes (20%)	Synergistic data use within M/D	30%	6%
	Inter-agency data collaboration	30%	6%
	Prescriptive Analytics	10%	2%
	Good practices	30%	6%

# Score of Ministry of Tourism in DGQI 2.0

	Q4 Score (21-22)
Data System	0.8
Data Driven Outcomes	0
Data Strategy	0.7

	Q3 Score (22-23)
Data System	0.8
Data Driven Outcomes	3.23
Data Strategy	3.5

# Assistance from DGQI Project Management Unit

## IMPACT

**Ministry of Tourism among the Top 10 M/D**

### Increased DGQI scores

- Improved data systems & preparedness
- Real-time data monitoring across schemes
- Data driven policy making
- Increased capacities
- Improved budget utilization & on-ground impact
- Incorporation of best practices

# Approach

# Envisaged Key Thematic Interventions (1/3) – Scheme Wise

## Data Strategy

- Define/document detailed ToR for all DSU verticals/sub-units i.e., Monitoring Unit, Statistics Unit, Technology Unit, Analytics Unit), including mechanisms for regularized progress reviews at DSU Head/Secretary level

## Action Plan

- Development of an Action Plan basis the data strategy. Creating objective monitoring frameworks to measure data preparedness for all CS/CSS schemes of the M/D with clearly defined timelines & responsibilities

## Data Management

- Establish guidelines/ SoPs for data design, data collection, data sourcing, data processing, storage, exchange, archiving, retention and removal
- Define data ownership norms
- Develop Governance Framework, and Risk & Value assessment framework for collected data

## Synergistic Data Use

- Data gap analysis at inter-M/D level w.r.t decision making /policy planning, and development of implementation plan to resolve identified data gaps
- Integration of schematic data systems for seamless data sharing across scheme divisions

# Envisaged Key Thematic Interventions (2/3) - Scheme Wise

## Inter Agency Data Collaboration

- Facilitate/Strengthen collaborations with other agencies– other M/Ds, private agencies, research organizations etc.– for improvement of data systems; seamless data sharing through APIs integration; and use of non-conventional data sources/emerging technologies etc.

## Prescriptive Analytics

- Increased focus on cross-functional prescriptive analytics with institutionalized mechanisms for regular prescriptive data analysis reporting and policy review meetings with schematic divisions

## Good Practices

- Identification and dissemination of best practices for strengthening data-driven decision-making (non-schematic or scheme level) within M/D to enable cross learning and accelerated progress

## Data Generation

- Identification and documentation of schematic data requirements
- Strengthen mechanisms for data collection and digital reporting for all identified input, output and outcome indicators in accordance with required frequency of data reporting and granularity of data

# Envisaged Key Thematic Interventions (3/3) - Scheme Wise

## Data Quality

- Develop documented mechanisms and detailed methodology for data quality assessment including protocols for data cleansing, data deduplication, data integrity and data quality control( e.g., data verifications and feedback measures etc.)

## Data Analysis, Use & Dissemination

- Undertake data analysis on collected data, including cross schematic/sectoral data–Descriptive; Exploratory; Inferential; Predictive; Causal; and Mechanistic Analysis etc.
- Develop/Augment management dashboard used by officials for visualizing KPIs/KRAs at granular levels, map info, key trends and issues

## Use of Technology

- Identify and develop use cases/application of emerging technologies e.g., AI/ML/Blockchain/IoT/Big Data/Drones in scheme implementation
- Monitor integration/linkages of scheme MIS with PFMS/Aadhaar/Mobile no/Bank accounts/GSTN/Udyog Aadhaar etc.

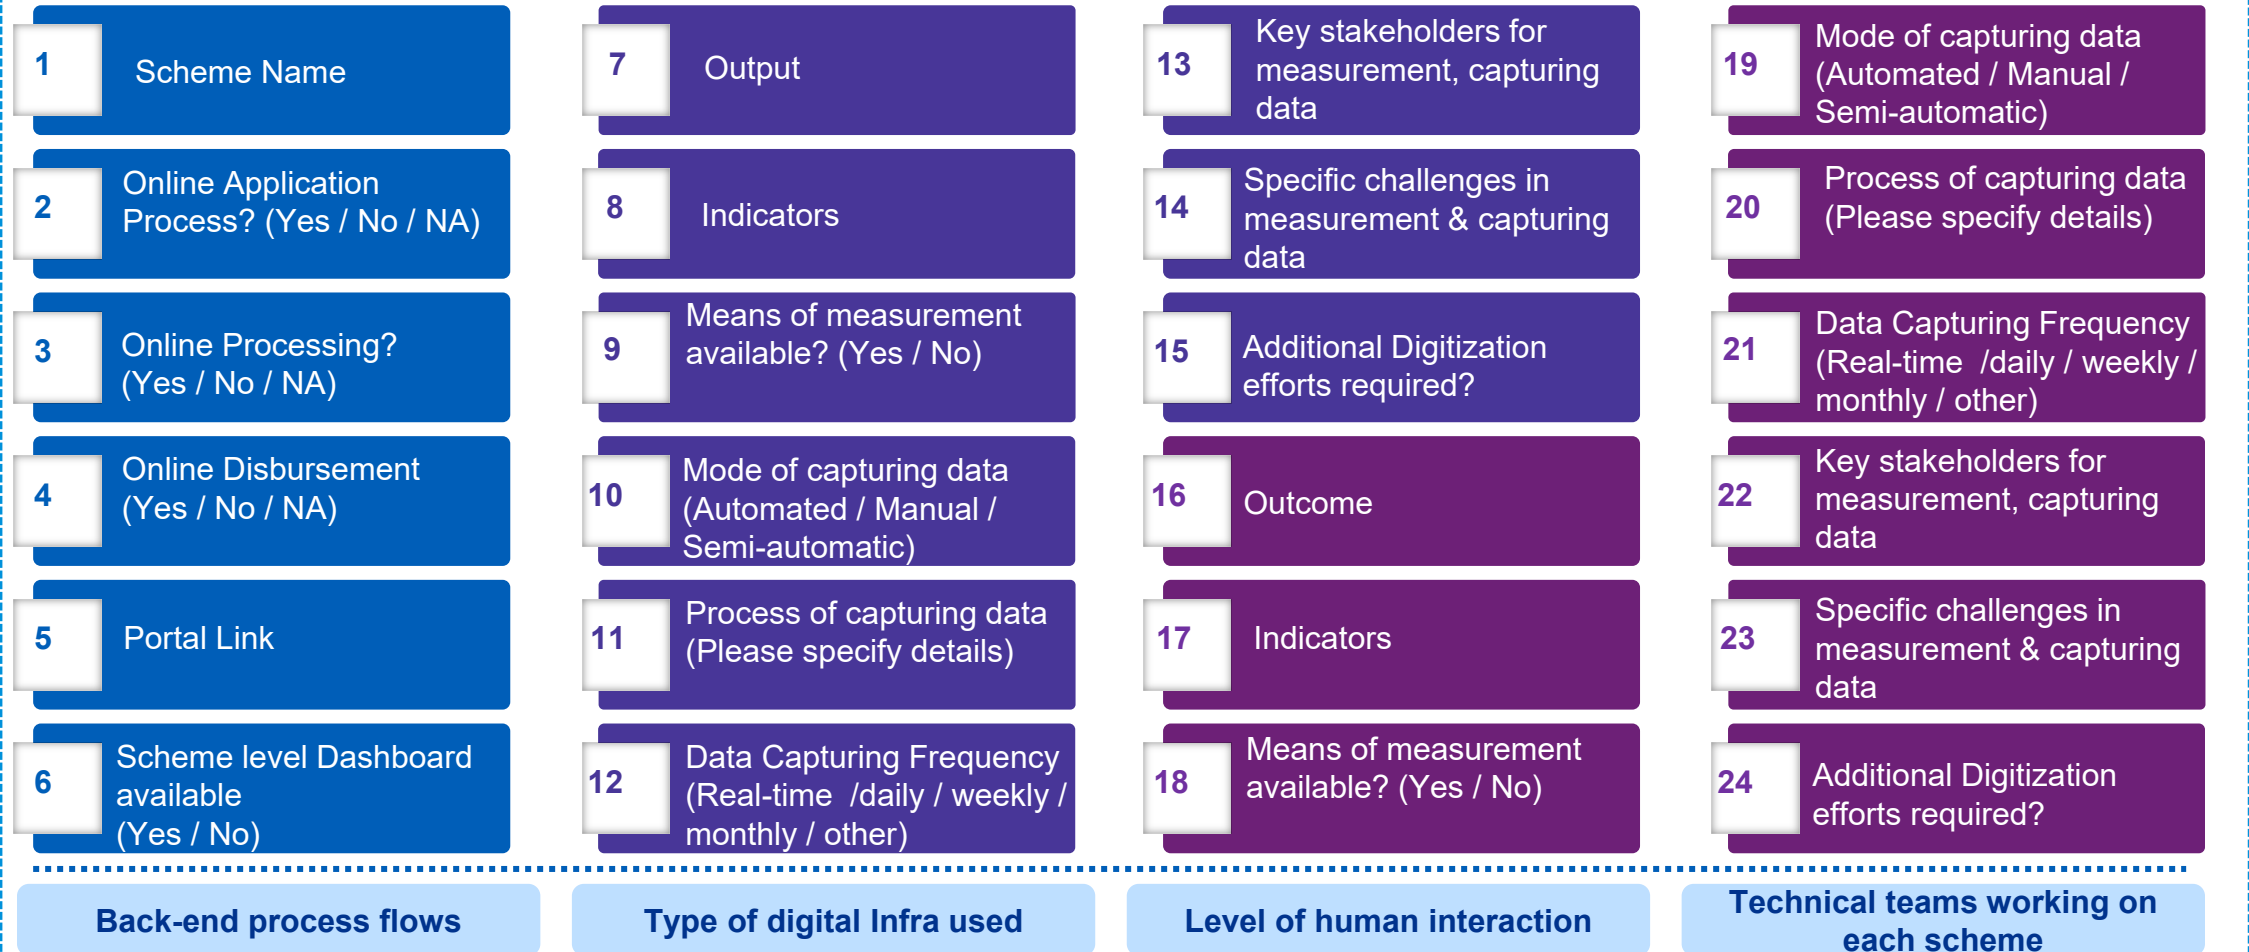

## Data Security & HR Capacity

- Establish and monitor regularized security measures i.e., third-party audits, use of SSL certificates and firewalls, security of sensitive/personal info(i.e., SFA/ MFA/Access control/Data encryption/Data anonymization/User Authorization etc.), and encrypted channels for external communication/ 3rd party integration/ API integration etc.

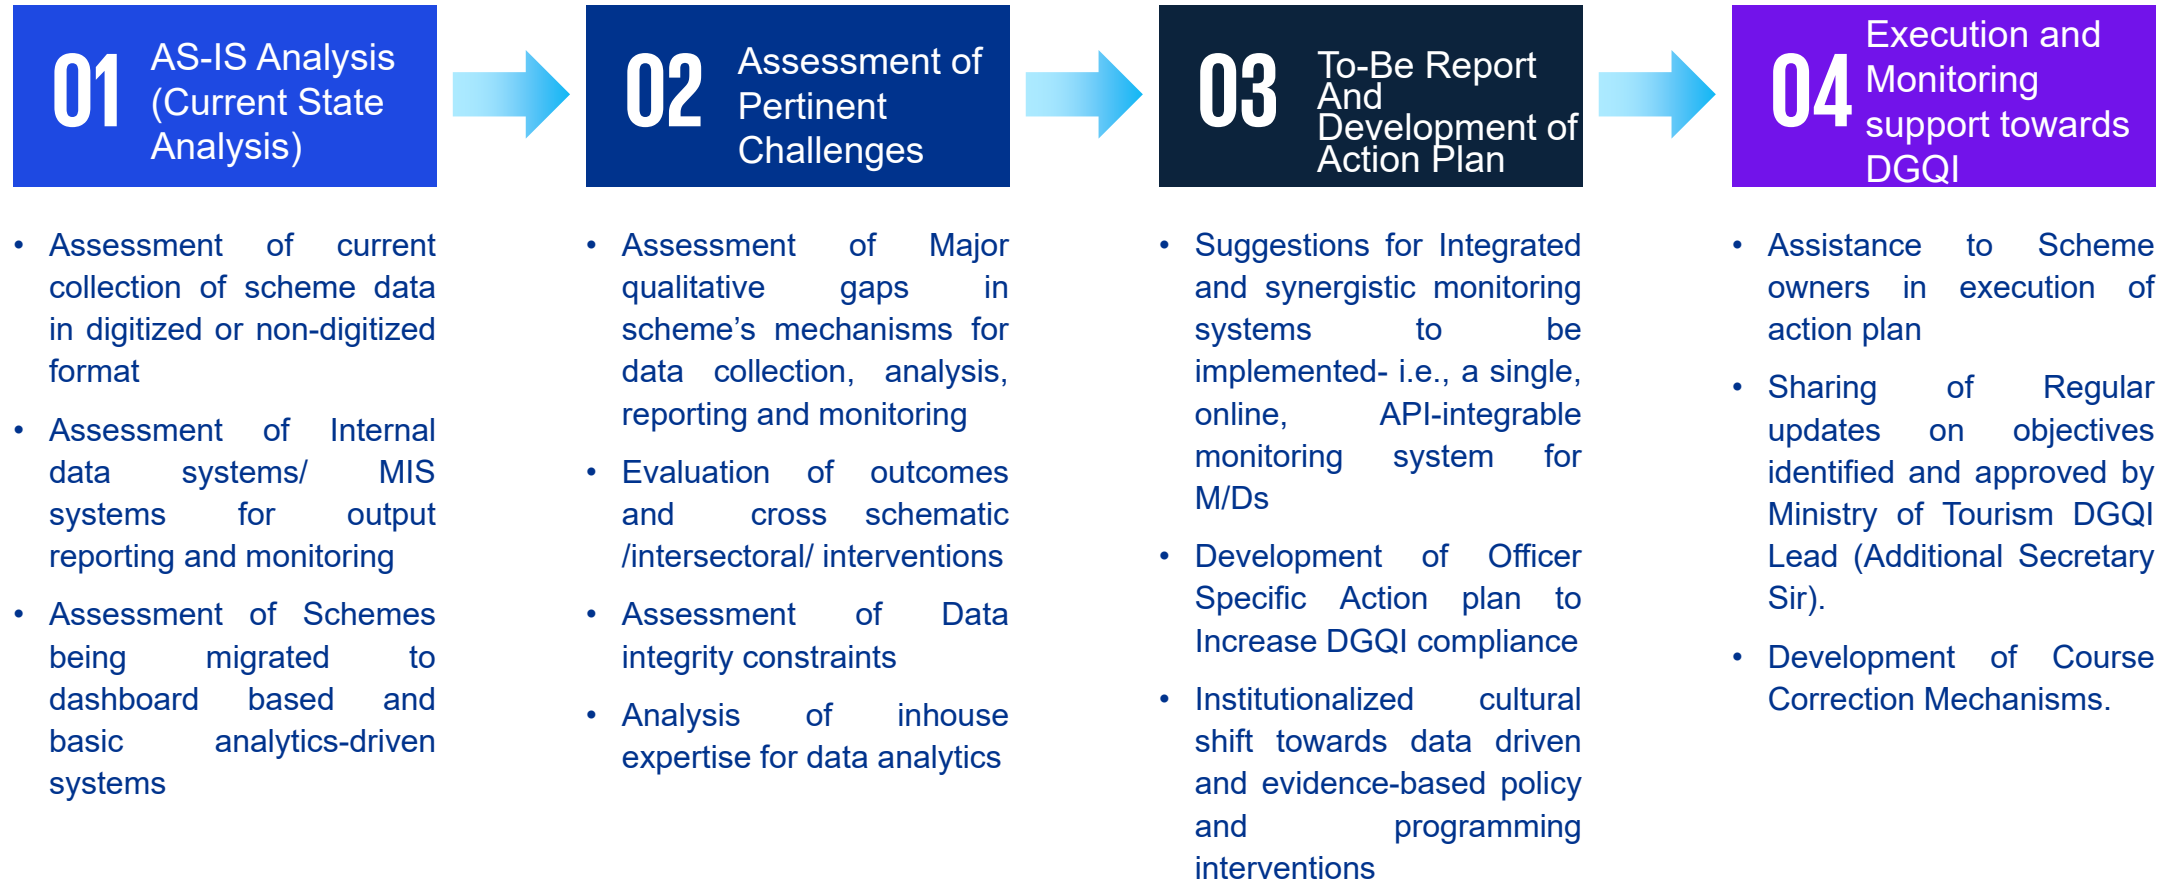

# Illustrative Scheme Assessment framework

## Scheme Level Data Preparedness

Creating a comprehensive data mapping table for each scheme, with parameters such as :

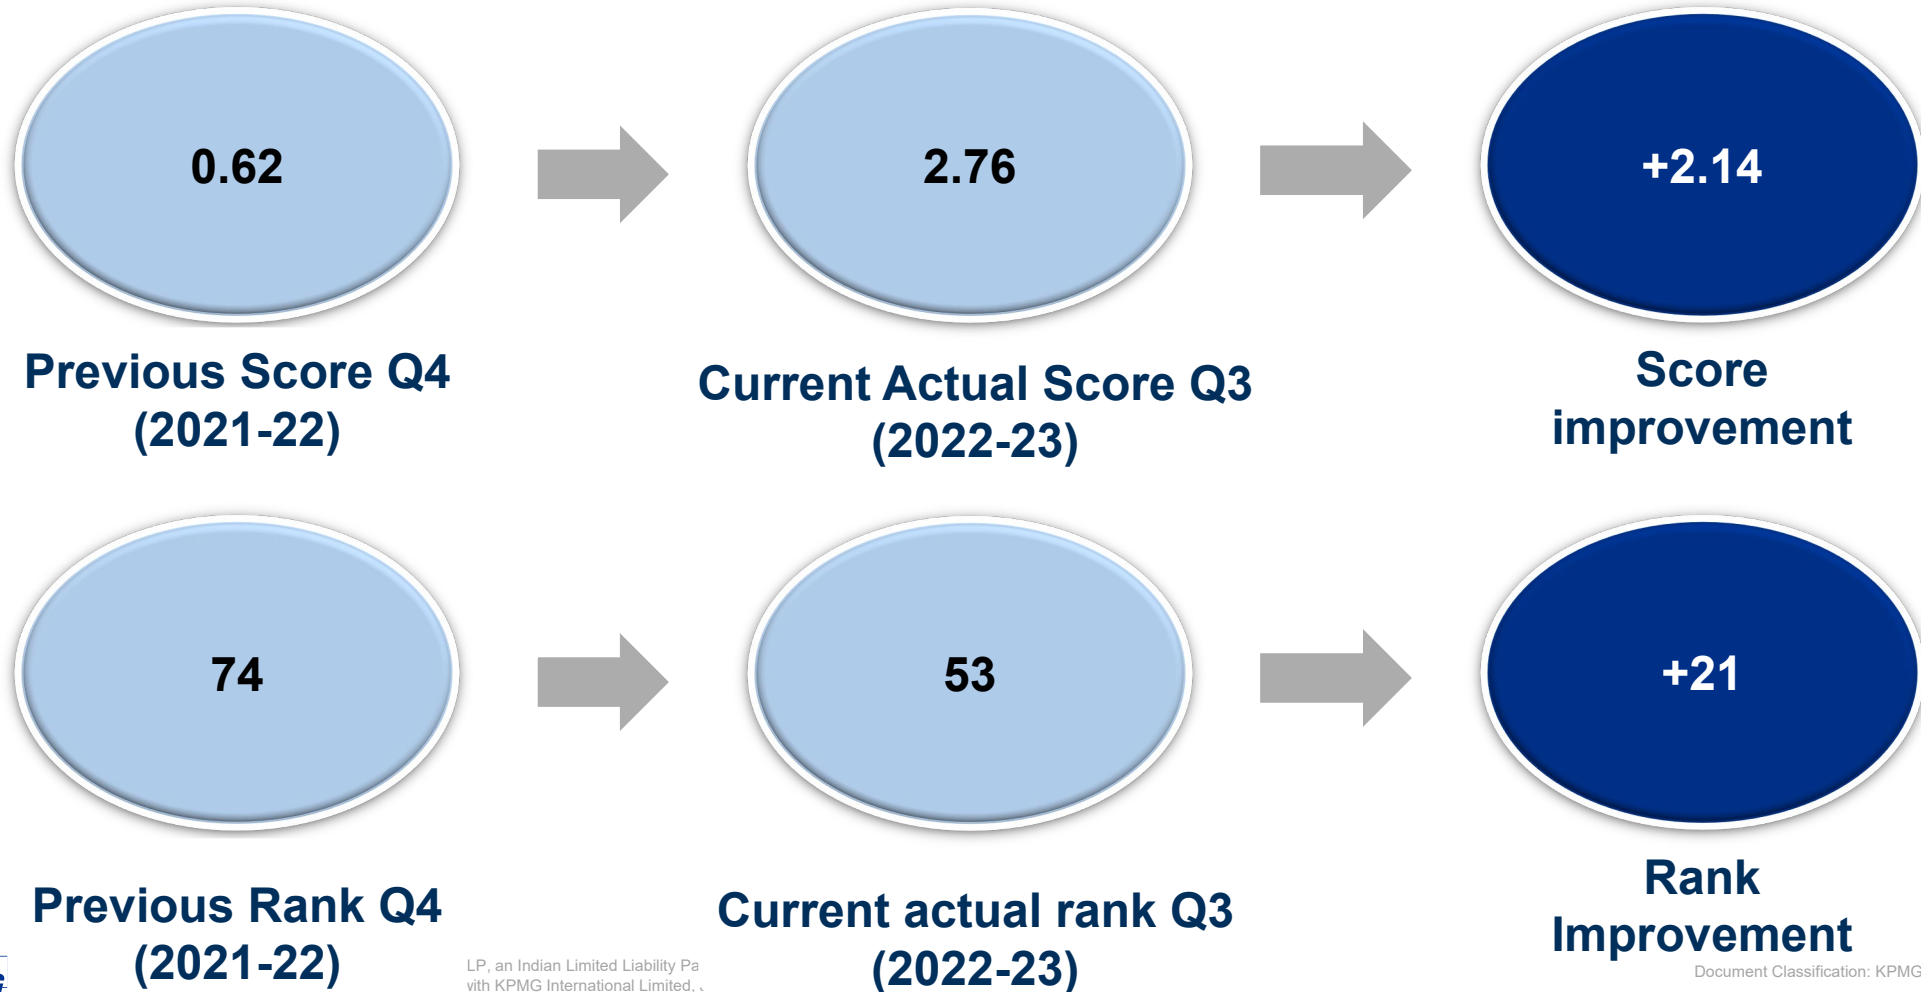

# Our Approach

# Incremental shift in DGQI Score

There is an incremental shift in the DGQI score since DGQI team stepped in

# Thank you!
